

TOP 5 EDITING APPS

There are so many photo-editing apps on both Android and Apple it's hard to find which one is the right one for you. You may be picky so you'd rather download different apps for each feature, or you rather use your phone space with a more convenient editing app that has everything you need. Here are apps that may be useful for you.

Snapseed- It's like a mini Photoshop in your cell phone, from basic editing to small details in your picture it does it all! What is more amazing is that it is absolutely free; you'll find your favourite Instagram bloggers use it. The app most known features are the advanced brushes which allow the users to edit minor details such as healing areas, an example being unwanted spots, make them disappear as if they were never there. This app is for those who want to get straight to professional editing because detail is key, and yes it is free!

VSCO- For those who find it long to edit yet want the best for your photos before sharing it on your social network, this is the app to use to preview your Instagram feed. Some filters require you to purchase them however; do not worry because the app has free filters to download and preinstalled filters. VSCO also has it's own sharing platform which allows people from around the world to view each others pictures, this feature is amazing because it has it's own community of photographers inspiring each other.

Afterlight- Only 59p think of it as 1p per filter. The app comes with 15 adjustment tools, 66 textures, frames, cropping and transformation tools! It became more popular after being featured by Youtubers who swear it's their go to app for filters. Afterlight is more popular among the apple users but it's time us android users see what the craze is!

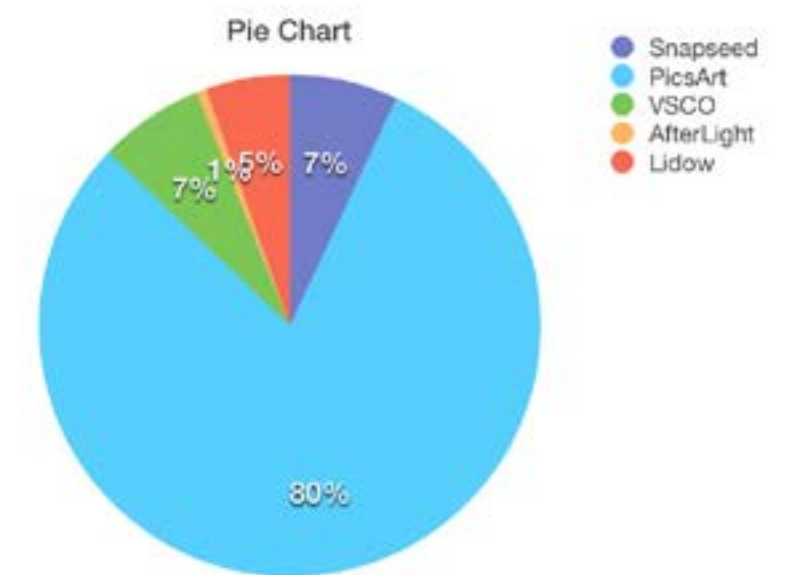

Lidow- For the hipster editors out there this may be your new favourite editing app. It has text, filters, shapes and cool ways to overlay images together. It is a rising app of 2016, though it isn't as popular as the others this is worth a try for those who like to explore. Yes, it is free!

PicsArt Photo Studio- With the most amount of downloads it isn't a surprise that PicsArt is first place in the Google play store! It has amazing features that take editing through your phone to another level! The app allows users to create their own filters, draw and paint with advanced brushes, overlay and play with image colour with colour splash.
