

# MY WORDPRESS SITE

By Maddison Waterman

### The background:

I chose a lighter image as they are more aesthetically pleasing to look at. The keyboard and camera symbolise journalism.

### Improvements:

- Replace the background image once I have made a decision on the main vision for my website to a more suitable image.
- Try and change the colour.

# MADDISON WATERMAN

ITS ALL NEWS TO ME

## Tag Line:

I went with a relaxed tag line as I would like to focus my website as more like a blog , meaning my news would be more relaxed

HOME

NEWS

BLOG

ABOUT ME

CONTACT

## Menu:

The categories I chose so far are “news” and “blog”

The news is work produced mainly for class whereas the blog is what I ultimately aim to achieve to be posting.

## Improvements:

- To come up with a better name more suited to my vision.
- To add more categories such as coursework.

## Side bar:

I included many widgets such as a

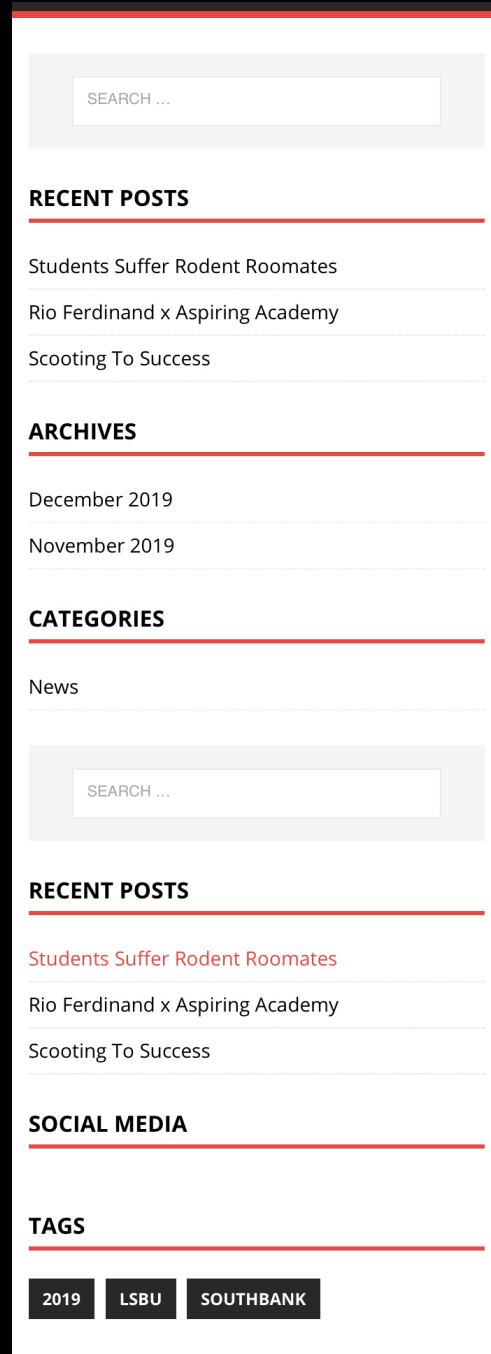

-search bar as it's a easy way for people to find specific stories

-Recent posts to keep people up to date

-Archives as another way to access by dates

-Categories for people interested in specific themes

- A tag cloud

## Plugins:

I have the 'sticky sidebar' plugin activated to help the site run smoothly

## Improvements:

To fix the social media widget I added to the sidebar

To add more plugins
